RE: Early Concept Rendering of Building

Due to the number of requests we have received for a rendering of what the buildings will look like after the project is finished, we are now able to show an early version that was created by Alliance Engineering, prior to when they dropped off of the project. *Please note that this is an early concept rendering that still shows the tile roof, gable vents that will no longer exist, and vertical siding that will not be used. The siding placement and colors have not yet been determined. A final version should be available before too long.*

Also, it should be noted that a great deal of the work will be invisible as it consists of proper weatherproofing around doors and windows, repair of any damaged structural members and a rain screen to prevent any moisture from migrating into the building itself.
